

**EXTRAORDINARY DISCOVERY.**—Professor Von Grusselbach, of Stockholm, has very lately brought to a state of perfection, the art of producing a torpor in the whole system, by the application of cold of different degrees of intensity, proceeding from a lesser to a greater, so as to cause the human body to become perfectly torpid, without permanent injury to any organ or tissue of the frame. In this state, they may remain one hundred or a thousand years, and again, after a sleep of ages, be awakened to existence, as fresh and blooming as they were when they first sunk into this frigorous slumber.

The attention of the learned Professor was first led to the subject by finding a stonel enclosed in a solid fragment of calcareous rock, ten feet in diameter which when taken out showed unequivocal signs of life—but it is supposed that the concussion caused by blasting the rock caused its death in a few hours after. The opinion of Baron Grubitz, who is at present geologist to the King of Sweden, was that it must have been in that situation for at least seven thousand years—and his calculations were drawn from the different layers of strata by which it was surrounded. From these hints, the Professor proceeded to make experiments, and after a painful and laborious course for the last twenty years of his life, he at last succeeded in perfecting the great discovery. Not less than sixty thousand reptiles, shell-fish, &c., were experimented on before he tried a human subject. The process is in full entirely before the public as yet, but I had the honor to be company with a friend, of calling on the Professor.

I shall give a slight description of one of the outer rooms containing some of his preparations. Previous to entering, we were furnished with an India rubber bag, to which was attached a mask with glass eyes. This was put on to prevent the temperature of the room from being raised the slightest degree by our breathing. It was a circular room lighted from the top by the sun's rays, from which the heat was entirely disengaged by its passage through glass, &c., colored by the oxide of copper, (a late discovery and very valuable to the Professor.)

The room is sheltered all around, and contains nearly one thousand specimens of animals.

One was a Swedish girl from appearance about nineteen years—she was consigned to the Professor by order of the government to experiment upon, having been guilty of murdering her child. With the exception of a slight paleness, she appears as if asleep, although she has been in a state of complete torpor two years. He intends to resuscitate her in five more years, and convince the world of the soundness of his wonderful discovery. The Professor, to gratify us, took a snake out of his cabinet to another room, and although it appeared to us to be perfectly dead and rigid as marble, by application of a mixture of cayenne pepper and brandy, it showed immediate signs of life, and was apparently as active as ever it was in a minute, although the Professor assured us it had been in a state of torpor for six years.

**How to PUT OUT FIRES IN THE Holes of SHIPS.** The following letter from the London Times contains information which will be of great interest to Captains of vessels and others:

The owners of the Caleb G. in shaw demands a means for extinguishing fire in the hold of a ship. The materials required are nothing more than a cask of common chalk in the bottom of the hold connected with the deck by a small pipe, and a two gallon bottle of sulphuric acid, which, on the alarm of fire, being poured down the pipe, will generate a sufficient quantity of dense smoke (gas in which flame cannot exist) to extinguish any fire, however large. Enclose my card, in accordance with your rule, but any chemist knows flame cannot exist in carbonic acid gas, which is generated by the action of the sulphuric acid on the chalk.

Some of the friends of Mr. Calhoun assert that he will never again, in any reasonable probability, be able to take an active part in public affairs, his health being completely prostrated. Mr. C. is now more than 70 years of age.

A punctilious temperance lady refuses to speak to a shoemaker because he uses a punch in his business.

## The Daily News.

NEWPORT.

BY CRANSTON & NORMAN  
127, THAMES STREET.

SATURDAY MORNING, FEB. 2, 1850

### WHIG NOMINATIONS.

FOR GOVERNOR,  
HENRY B. ANTHONY,  
of Providence.

FOR LIEUT. GOVERNOR,  
THOMAS WHIPPLE,  
of Coventry.

FOR SECRETARY OF STATE,  
CHRISTOPHER E. ROBBINS,  
of Providence.

FOR ATTORNEY GENERAL,  
JOSEPH M. BLAKE,  
of Bristol.

FOR GENERAL TREASURER,  
STEPHEN CAHOON,  
of Newport.

**II.—**The Lecture on Thursday evening, before the Mechanics' Association, was by Professor Richard S. Willis, of Yale College; his subject was "Social Life in Germany." He minutely described the different Social amusements peculiar to the people of that land of music, song, and learning. After leaving College, Professor Willis went to Germany, where he remained six years perfecting himself in Music, for which he had a marked natural talent, and qualifying himself to teach and compose it, in its higher branches.

The lecture was written in a pure, classic style, and was delivered in a modest, unassuming manner. Its language was very choice selected without any affectation, and some of his descriptions were classically beautiful in a high degree. There was, in fact, throughout, a vein of poetic thought pervading the lecture, and the tone of his voice and its pleasant and graceful modulations were all in keeping with the harmony of his language.

The audience was large and very attentive, which is generally an evidence of satisfaction with what is being said.

**III.—**The following are the Compromise Resolutions reported to the Senate by Mr. Clay:

It being desirable for the peace, concord and harmony of the Union of the States, to settle and adjust amicably all the questions of controversy between them arising out of the institution of slavery, upon a fair, equal and just basis, therefore,

Resolved.—That California, with suitable boundaries, ought upon her application to be admitted as one of the States of the Union, without the imposition by Congress of any restriction as to the exclusion or introduction of slavery within those boundaries.

Resolved.—That as slavery does not exist by law, and is not likely to be introduced into any of these territories acquired by the United States from the Republic of Mexico, it is inexpedient for Congress to provide by law either for its introduction into, or its exclusion from, any part of the said territory; and that appropriate territorial Governments ought to be established, by Congress, in all of the said territories, not assigned by the boundaries of this proposed State of California, without the abolishing of any restriction or condition on the subject of slavery.

Resolved.—That the Western boundary of the State of Texas ought to be fixed on the Rio del Norte commencing one marine league from its mouth and running up that river to the Southern line of New Mexico, thence with that line easterly, and continuing with the same direction to the line as established between the United States and Spain, not extending any portion of New Mexico, whether lying on the East or West of that river.

Resolved.—That it be proposed to the State of Texas that the United States will provide for the payment of all that portion of all legitimate and bona fide public debts of that State, contracted prior to its annexation to the United States, and for which the duties of foreign imports were pledged by the said State to its creditors, not exceeding the sum of — dollars, in consideration of the duties as pledged, having been no longer applicable to that object after the said annexation, but having therewith become payable to the United States; and upon the condition, also, that the said State, shall, by some solemn and authentic act of her Legislature, or of a convention, relinquish to the United States any claim which it has to any part of New Mexico.

Resolved.—That it is inexpedient to abolish slavery in the District of Columbia while that institution continues to exist in the State of Maryland, without the consent of that State, without the consent of the people of this District, and without just compensation to the owners of slaves within the District.

Resolved.—That it is expedient to prohibit within the District the trade in slaves brought into the district from the States, or places beyond the limits of the District, either to be sold therein as merchandise, or to be transported to other markets without the District of Columbia.

Resolved.—That more effectual provision ought to be made by law according to the requirements of the constitution for the re-

teration and delivery of persons bound to service or labor in any other State or territory of this Union.

Resolved.—That Congress has no power to prohibit or restrain the trade in slaves between the slaveholding States, and that the admission or exclusion of slaves brought from one into another of them depends exclusively upon their own particular laws.

GENERAL ASSEMBLY,  
JANUARY SESSION,  
Thursday Morning.

**DISEASE.**—A number of Private Petitions were received and referred to the appropriate Committees.

An act in addition to an act enlarging the powers of the Town Council of Newport; the House concurred in the amendment of the Senate.

An act in relation to insane persons.—This act authorizes the Governor to draw upon the Treasury, annually, for a sum not exceeding five hundred dollars in any one year, to be by him appropriated to the maintenance, at the Butler Hospital, of such insane persons, being inhabitants of this State, as he may see fit, as State hospital patients.

On motion of Mr. Browne, of Gloucester, the sum of five hundred dollars was increased to the sum of one thousand dollars.

Mr. Davis, of North Providence, moved in amendment, to add to the bill the following: "provided that not more than forty dollars shall be appropriated annually for the support of any one person."

This amendment prevailed; and the bill, thus amended, after debate, was passed.

Adjourned to 3 o'clock.

Afternoon.

HOUEN.—Petition of James S. Hunt, in aid of petition of Joseph Adams, et al. requesting Pilots; read and referred to Special Committee on that subject.

Mr. Cranston, of Newport, called up the resolutions relating to the standing rules of the House.

The resolutions were read, and Mr. Brewster moved their reference to the Committee on Education.

Mr. Cranston called for the ayes and noes. The House was called and the vote stood as follows:

AYES—Messrs. Geo. B. Alldrich, Babcock, Brown, Bidwell, Bowditch, Bowen, G. Brown, P. Brown, G. H. Brown, Bullock, Chase, Ellis, Farmer, Finch, Gaynor, Goodlin, Gray, Green, H. Harris, D. S. Harris, R. Harris, Hazard, Hopkins, Howard, Matthews, Peaty, Pollard, Radcliffe, Simford, Standish, Stodder, Shafford, Stevens, T. Spencer, Sprague, Tontellier, Turner, Walcott.

NOES.—Messrs. Geo. Alldrich, Ames, Angell, D. Anthony, J. Anthony, Arnold, Barber, Cranston, Davis, Ellick, Fisher, Gorham, Gould, Hodge, Porter, Ross, Sheldar, Steere, Updike, Woodward.

The motion prevailed.

An act to establish the office of Auditor of Accounts. Reported by the Special Committee, to whom the subject was referred. The second reading of the bill.

A long discussion was had on this bill, pending which the House adjourned.

WASHINGON Thursday, Jan. 31.

**SENATE.**—The House message was read. Mr. Durbin moved an adjournment in respect for Mr. Dickinson. Mr. Clay opposed the adjournment as wholly uncalled for. Mr. Durbin wished the message presented.

A communication was received from the President in answer to Mr. Houston's resolution of the 17th January. On motion the communication was laid on the table and ordered to be printed.

On motion of Mr. Davis, of Miss., the Census bill was made the special order of the day for Monday.

Mr. Cass, Austrian resolution was taken up.

Mr. Houston made a speech in opposition, and Mr. Poore in favor of it.

Mr. Smith made a speech of practical suggestions. The only way the Senate had Jurisdiction was by repealing the act which created office for the current year.

Mr. Poore facetiously congratulated every body in Mr. Smith's speech.

Mr. Smith rejoiced briefly, and the subject was then passed infinately over.

The Senate went into Executive session, and then adjourned.

Why is a lady's hair like a bee hive? It holds the comb.

“I tell you,” says a wario friend of a newly elected Senator, to an old sober headed politician, “your party may say what they please, but you cannot deny that Mr. C. is a sound man.” “That's just what we're afraid of,” replied old Bassett; “it's our opinion that he's all sound!”

“Stocks are firm,” as the rogue said when he had his feet in them.

“They who when about to marry seek their happiness in the mere gaining of fortune and personal beauty, evince a symptom of a heartless disposition, and their folly is often punished in their success.

Go to Oak Hall, Boston, for your supply of fall and winter clothing. Mr. Simons has a stock which cannot fail to suit every taste, and the prices are extremely cheap.

There are some that live without any design at all, and only pass in the world like straws upon a river; they do not go, but they are carried.

Miss Frederika Bremer, accompanied

by Miss Anne C. Lynch, the poetess, is about to visit Washington.

FOR CALIFORNIA.—The ship Monterey, of 600 tons, Capt. McNamee, sailed on Sunday for San Francisco, having on board Company I of the first regiment of light artillery, lately stationed at Fort McHenry, and a large quantity of Government stores, the conveyance of which she has been chartered by the War Department. The following are the officers of the company:

First lieutenant A. R. Eddy, commanding; 1st lieutenant F. E. Patterson; 2nd lieutenant D. M. Beltzhoover; assistant surgeon R. O. Abbot; master Frank Field.

The company is composed of 84 non-commissioned officers and privates. Lieut. Beltzhoover is accompanied by his lady, to whom he has been but recently united; and ten of the soldiers of the company are also accompanied by their wives and families. In addition to the battery of the company, the Monterey also takes out ten 32 pounder and ten 24 pounder iron guns; 1000 32 pounds balls, 1000 24 pounder balls, and a large quantity of ammunition. She has also on board the following government stores: 1000 bbls substance stores; 33,600 bricks, 5000 feet dressed flooring, and 3500 bushels of oats. Col. Magruder, who is to have command of the company, will go out by the Panama route.

BOARDING SCHOOLS.—Holmes describes fashionable boarding schools very truthfully in the following lines—

They sent her to a pretty school;  
Twas in her thirteenth June;  
And with her, as the rules required,  
Two towels and a spoon.  
They kissed her back against a board,  
To make her straight and tall;  
They turned her up, they started her down,  
To make her light and small.  
They pinched her feet, they singed her hair,  
They scolded it on with pins—  
O never mortal suffered more  
Influence for her sins!

SALARIES OF GOVERNORS.—The salary of the Governor of Maryland is \$2,000, and an attempt is now being made in the Legislature to increase it to 4,000, which was formerly the sum. The Governor has a house furnished by the State, and must reside at the capital. There is but one Governor in the Union whose salary exceeds 4,000, that is the Governor of Louisiana, who has \$6,000. The Governors of the other States receive salaries as follows: Maine, \$600; New Hampshire, 1,000; Vermont, 750; Massachusetts, 2,500; Rhode Island, 400; Connecticut, 1,100; New York, 4,000; New Jersey, 2,000; Pennsylvania, 3,000; Delaware, 1,333; Virginia, 3,333; North Carolina, 2,000; South Carolina, 3,500; Georgia, 3,500; Florida, 2,500; Alabama, 2,500; Mississippi, 3,000; Texas, 2,000; Arkansas, 2,000; Tennessee, 2,000; Kentucky, 2,500; Ohio, 1,500; Michigan, 1,500; Indiana, 1,500; Illinois, 1,000; Missouri, 1,000; Iowa, 1,000; Wisconsin, 1,250.

DIGGING GOLD—SUB-MARINE ARMOR.—Mr. G. S. Kimberly, now in California, writes home, recounting the success he has met with in procuring gold from the beds of the rivers by means of J. E. Gowen & Co.'s sub-marine armor. On one occasion he digged \$800 in five hours, at the depth of 25 feet. In six weeks he had realized the handsome sum of \$18,500. He had been offered \$5000 for his armor and had refused it.—New Bedford Mercury.

THE AGE OF GOLD.—PARK BENJAMIN, of New York, will deliver a Lecture on "The Age of Gold," before the citizens of Newport, on Tuesday evening February 5th, at the Atlantic House Hall, at 7 o'clock. Tickets 12 1/2 cents. Jan. 31.

## MECHANICS' LECTURES.

THE sixth Lecture before the Mechanics Association will be delivered on Thursday Evening, Jan. 19th, by Fletcher Webster, Esq., of Boston, after which they will be continued as follows:

- 1st, Leonard Woods, Jr., D. D. Prentiss, 21st, Rev. Henry Gyles,
- 2nd, Prof. Richard S. Willis, N. Haven, Feb. 7th, O. A. Brownson, Esq., Boston, 21st, Edmund Quincy, Esq., Boston, 21st & 28th, P. Whipple, Esq., Boston.
- Tickets for the Course, \$1, to be had at W. A. Barker's, C. E. Harriet, Jr., B. J. Tilley's, New Haven, and at the door.
- Single Tickets 25cts. Members tickets will be delivered at S. A. Parker's, (see below.)

[See 17.]

## DRA. CORBETT'S HIGHLY CONCENTRATED SYRUP OF SARASAPILLA.

It is a remarkable fact that no medicine ever brought before the public has proved so beneficial in cases of disordered Blood, Liver Disturbance, Scrofulous Taint, Consumption, Ulcers, and all cutaneous affections, as that of Dr. Corbett's. The distinguished Prof. Hayes says—"It might have a preference, as the formula exhibits the union of some of the best of our native medicated roots and plants, with substances of the highest reputation as remedial agents, and does not include any Medicinal Compounds."

But real what Druggists say, whose well known characters give full assurity to its virtues.

The Compound Concentrated Syrup of Sarasapilla, made by the United Society of Canterbury, is prepared with great care, and the increasing demand for it is positive proof of its good effects. It is now prescribed by most of the Physicians in Boston and elsewhere, which is the best evidence that they give it a preference over any other preparation of Sarasapilla offered to the public.

Since its introduction, its reputation has been constantly increasing, and its popularity extending in every direction, being recommended by many distinguished physicians.
